## Fonts

---

If you want to host the fonts on your own server instead of Google's CDN (Content Delivery Network), you can either download and the font [Roboto Font](#) from web or used font files in folder "fonts".

Otherwise, the fonts will be loaded from Google Font CDN as default to make your web load faster and lower number of connection to your web server.

Fonts used in Template are included in "fonts" folder.

## Template

---

Material is fully responsive HTML5 and CSS3 template. HTML and CSS code is well commented and easy to understand. Group elements are highlighted at the beginning and also at the end by comments.

Basic HTML code structure:

```

261  \*-----*/
262 .box{
263   padding: 1rem;
264   background-color: #fff;
265 }
266 .box{margin-top: 1rem;}
267 .box:last-of-type{margin-bottom: 1rem;}
268 .box__row{
269   display: -webkit-flex;
270   display: -ms-flexbox;
271   display: flex;
272   -webkit-justify-content: space-between;
273   -ms-flex-pack: justify;

```

All JavaScript files, including jQuery plugins can be found in "js" folder. Inside this folder is also folder "vendor" containing offline version of jQuery 2.1.4.

For your own JavaScript code, in "js" folder is prepared file "scripts.js".

Images are included in "images" folder and ready to use.

Every image is optimized to lower the bandwidth. All images are styled through CSS, so you don't need to worry when replacing default images with your own.

Template's grid width is 960px and it is fully responsive, ready for every resolution and device.

Template supports all main browsers - IE10, Firefox, Google Chrome, Safari, Opera, Opera Mini, Android Browser and Chrome for Android.
